

# COMPLETE BACKGROUND CHECKS 100 TIMES FASTER

**Fetch for Background Checks is:**

**FASTER**

On average, it takes 2.5 minutes for a person to manually fulfill a record/no record background report. With Fetch for Background Checks, these same reports are automatically fulfilled in only 9 seconds.

**TRUSTED**

Fetch is the trusted provider for six of the 10 largest background screening companies in the world.

**RELIABLE**

In 2009, Fetch Technologies processed more than 4 million data transactions for background check companies.

**Your clients depend on you to quickly deliver the most accurate, timely background information about candidates.**

Relying on old-fashioned techniques to conduct background checks means you may be delivering less than reliable information—on a dated timetable. Candidate data that was traditionally gathered at court houses or municipal buildings has moved online, and to access and deliver this new background information, you have to use faster, more reliable technology.

Fetch for Background Checks can help you access background data in an automated way that can help reduce labor costs and increase accuracy.

## FEATURES

- Automated access to over 300 online criminal background screening libraries and over 1,500 online jurisdictions around the country.
- Receive “no record” results instantly.
- Choose the sites that return the best results for you.
- Nightly reporting lets you see your transactional records for the day.
- Custom developments allow access to credit scores, sex offender registry, and education verification.
- Build full record extraction capabilities with our experienced professional services team.

## HOW FETCH FOR BACKGROUND CHECKS WORKS

The Internet is an environment of constant change, and websites and data evolve every day. Fetch for Background Checks offers a flexible, scalable solution that automatically adjusts to these changes. The system uses sophisticated machine learning technology that mimics human searching behavior to deliver rapid access to the information found on 300 online data sites and over 1500 jurisdictions nationwide.

### Hosted

Our hosted version is ideal for companies who want to be up and running quickly and have minimal IT or engineering resources. We host and maintain Fetch Live Access, and our professional services team works with you to configure rules that deliver more precise filtering.

- No software to install
- No complex IT knowledge needed
- No technology resources to maintain

### Software

Fetch Live Access onsite is perfect for companies that have adequate technical resources and require an out-of-the-box solution. The onsite version offers a suite of configurable software tools that can be customized to access and integrate information from multiple online background screening sites.
